

TUFDEK™ SYSTEM ADVANTAGE

With the wide variety of waterproof decking options on the market, the decision for choosing a product can often be confusing. Tuff Industries Inc. is an industry leader in vinyl decking and has taken the complex process of waterproofing decks to a new level with our Signature Brand, Tufdek. Our combination of manufacturing controls, independent testing, product audits and Authorized Dealers, make Tufdek the industry leader for professionally installed waterproof deck systems.

HOW TUFDEK™ IS MADE

TUFDEK™ IS GREEN

At Tuff Industries Inc. we are committed to reducing our environmental impact. Tufdek is the only manufacturer using low VOC aqueous based inks and a polycarbonate top finish. This improves the stain resistance and makes Tufdek easier to clean. It also provides better U.V. protection which results in longer lasting, more vibrant colors. These innovations have helped to extend the service life of Tufdek and reduce our carbon footprint.

There is nothing better than enjoying your deck in the summer and that outdoor surface can sometimes get warm. For those of you who enjoy those full sun exposure days we recommend the Cool-Step™ designs. These colors provide higher solar reflectivity helping make your outdoor experience on the hottest days even more enjoyable. Look for the Cool-Step logo on select colors and choose a product that remains cooler in the sun.
